Bootstrap , Taliwind CSS ,
Material UI

My Projects

Attendance Web Application

MERN Stack Application

Final Hackhathon Project

I successfully developed a MERN (MongoDB, Express.js, React, Node.js) stack application, showcasing my proficiency in fullstack development. This project reflects my ability to create dynamic and responsive web applications, emphasizing my expertise in both front-end and back-end technologies

GitHub Users Finder

React JS & API

SMIT Assignment

I developed a Git user finder tool, showcasing my skills in software development. This project streamlines the process of locating users on Git, in programming and problem-solving. It reflects my commitment to innovation in collaborative coding projects

E Commerce App

MERN Stack

SMIT Assignment

I developed a products app, showcasing proficiency in ReactJs , from concept to deployment. This project highlights my commitment to innovative solutions, user experience, and staying current with technology trends.and also i use all mern stack accessories in this project to look more efficient

Work Experience

- ✓ I worked as a Front-End Developer at Xfinitive for 8 months, focusing on developing and maintaining responsive web applications. I collaborated with cross-functional teams, wrote clean code in HTML, CSS, and JavaScript, and contributed to successful project delivery, enhancing my skills in [React JS/Node Js] and [Mongo DB].
